

Blue Vervain

Verbena hastata

Growing Information

- Sunlight: Full to part sun
- Soils: Medium to Moist
- Bloom Time: July, August
- Size 3-4ft in height

Short-lived, doesn't compete well with more aggressive vegetation. It self-seeds readily and is easy to germinate.

Garden Companions

Culver's Root (*Veronicastrum virginicum*), Joe Pye Weed (*Eutrochium maculatum*), Obedient Plant (*Physostegia virginiana*), Turtlehead (*Chelone glabra*)

Nature Benefits

- Pollinators will visit.
- Seeds are valuable to small mammals and birds.

Natural Habitat

Occurs in marshes, swamp margins, and ditches.
