

Cutleaf Coneflower

Rudbeckia laciniata

Growing Information

- Plant Type: Perennial
- Sunlight: Sun, Partial, Shade
- Soils: Dry to moderate moisture
- Bloom Time: Yellow flowers July, August
- Size: 5-6ft in height; 3ft spread

Also called green-headed coneflower. Because it spreads rampantly by underground stems, cut-leaf coneflower is only appropriate for large sites. May need staking in garden situations but otherwise very hardy.

Garden Companions

Black-eyed Susan (*Rudbeckia fulgida* or *Rudbeckia hirta*)

Nature Benefits

- Pollinator magnet.
- Attracts birds.

Natural Habitat

Occurs on shorelines of lakes and rivers and swamps.
