

Spiderwort

Tradescantia ohiensis

Growing Information

- Sunlight: Full Sun, Partial
- Soils: Medium to dry
- Bloom Time: June, July
- Size: 2-4ft tall

Its grass-like foliage grows in an upright form. The lavender blue flowers bloom from morning to midday, and close in the heat of the afternoon. This helps the plant conserve energy that can be put toward flowering for a longer period. A good choice for a rain garden.

Garden Companions

Foxglove Beardtongue (*Penstemon digitalis*), Wood Aster (*Eurybia divaricata*), Canada Anemone (*Anemone canadensis*)

Nature Benefits

- Attracts pollinators and butterflies.

Natural Habitat

Occurs in fields and along roadsides.
